IDENTIFIERS *Missouri; *Public Higher Education; University of Missouri

ABSTRACT

Presented are data on student financial aid in Missouri collected as part of an annual state survey of higher education. In this first annual report the data are limited due to reporting limitations and inconsistencies, and the report is called preliminary. An introductory section discusses these limitations. In subsequent sections, supplemented with data tables, analyses are given in these areas: sources of student financial aid; composition of aid packages; the University of Missouri; state four-year institutions; state two-year institutions; independent institutions; and professional and technical institutions. Over $140 million in financial aid to students was reported in 1977-78. Among the conclusions drawn from this limited information were that: University of Missouri and independent sector students draw larger awards per capita than those in other institutions. Independent sector students received relatively more from the Missouri Student Grant Program and institutional sources, while public sector students received relatively higher proportions of aid from federal sources, including loan programs. Graduate student aid is included in all categories except the Missouri Student Grant Program. (MSE)

PREFACE

This report is the third in the Research and Planning Series initiated by the Missouri Department of Higher Education this year. The information in this report was provided by the institutions to the MDHE for the first time during 1978 as a part of the Department's state-level information system. The Division of Research and Planning is responsible for this report series.

PRELIMINARY REPORT ON

STUDENT FINANCIAL AID, 1977-78

I. Introduction

A significant source of financial support for higher education in the United States comes to institutions indirectly through student financial aid. Student financial aid information is now collected from Missouri higher education institutions on an annual basis as part of the new state-level information system implemented this year by the Missouri Department of Higher Education (MDHE). This information is collected for the purpose of informing planning and management decisions at the state and institutional levels. This report summarizes the financial aid data reported by Missouri higher education institutions to the Department this fall.

The information reported and summarized in this report is limited to data actually reported to the MDHE during the fall 1978. This report is intended to serve two purposes: to inform those interested in the extent and composition of student financial aid at higher education institutions in Missouri; and to point out some of the weaknesses in the current procedures used to collect and report financial aid information.

This is a preliminary report. The analysis of financial data for 1977-78 is limited at this time due to the large number of institutions not reporting and to inconsistencies in the reporting of these data. More detailed analysis of the 1977-78 award data will be attempted when better information is available.

The MDHE collects and maintains information on various sources of financial aid received by students in Missouri. Information on the Missouri Student Grant Program is collected and maintained by the Department as part of the administration of the program. A table summarizing the

amount of grants awarded to students at each institution in the state is appended (Table A-1). In addition, as part of the MDHE information system, data on other sources of student financial aid are reported to the MDHE. These latter data include financial aid directly from the primary student aid programs of the federal government (Table A-2), from other federal sources (Table A-2), from institutional sources, both need-based (Table A-3) and non-need-based (Table A-5), and from non-governmental and non-institutional sources, both need-based (Table A-6) and non-need-based (Table A-7). The MDHE also collects information on the total number of award recipients (Table A-8). The appended tables provide data for each institution with students who received awards from the Missouri Grant Program or that reported student financial aid information to the MDHE. These data provide the basis for this summary report.

Caveats

The summary data discussed and analyzed in this report are subject to several cautions. One major problem with the data reported in these tables is that several institutions were not prepared to report on the information since this is the first year financial aid data were collected on a routine basis. Another problem is that the management information systems used by many institutions for financial aid are not well developed and are in a state of flux. Due to these general circumstances, the data reported here are subject to the following caveats:

1. The instructions for completing the Student Financial Aid forms were not followed consistently. The major problem was that several institutions did not report award amounts in $1,000 increments, with $1,000 reported as "1." Approximately half of the institutions failed to report these data in thousands; this has postponed the automation of these data. Only the institutional totals for each source of student aid have been included in this report. More detailed reporting of information on income level or enrollment status, graduate or undergraduate, of award recipients cannot be analyzed until these reporting errors have been corrected. The forms with data reported in single dollar amounts instead of the requested $1,000 increments

have been returned to the institutions so that the corrected 1977-78 data can be automated. The automated data should be available for detailed analysis in the future.

2. There were inconsistencies in the way data were reported. As one example, some institutions reported Federally Insured Student Loans (FISL) in the "other loans" category of student aid from the federal government, on MDHE 14-1. Instead, it should have been reported under the FISL category of aid from "other federal sources" on MDHE 14-4. Other examples include inconsistencies in the reporting of institutional expenditures on student employment and the amounts of athletic scholarships; e.g., the University of Missouri-Columbia did not report the amount of institutional funds expended for athletic scholarships. These problems should be lessened during the second year of reporting. Instructions for reporting financial aid data will be clarified based on the first year's experience, and the institutions are working to improve their readiness to provide requested information.

3. Not all institutions are included in this report due to three types of reporting problems. Some institutions indicated they were not equipped this year to provide some of the information requested; some institutions reported a portion of the data on a given form; and some institutions did not respond in time to be included in this report or have not yet reported. Thus the summary information included in this report does not represent all institutions. The attached detail tables indicate which institutions did not report in time to be included in the analysis provided.

4. The Missouri Student Grant program data, presented in Table A-1, are reconstructed from historical files. Due to unavoidable data processing problems, which were beyond the control of the Department, the computerized files for 1977-78 were erased. The reconstructed data reflect accurate award amount totals

for each institution, but the actual number of award recipients may be greater for some institutions than what is reported here.

5. The total columns in Tables A-2 through A-7 are calculated from the data provided by the institutions. In instances where some of the detail data was not reported, the actual totals will be higher than the calculated totals included in this report. For example, for student financial aid from "other federal sources," several institutions did not estimate veterans administration (VA) award amounts, but they did provide estimates for FISL. In these instances, the calculated total for financial aid from "other federal sources" does not include VA awards.

6. Some of the data included in this report are the best available estimates rather than actual financial aid data. In particular the information included in the "other federal sources" category are estimated, since these funds are given directly to students and most institutions do not have records of these funds. There appear to be extreme variations in the award per student, (Table A-3), which suggest variations in the method used to calculate these estimates. In addition, not all reporting institutions attempted to make these estimates. The total from other federal sources reported, therefore, is lower than was actually received by students.

II. Summary, Student Financial Aid, 1977-78

A total of $141,863,000 of student financial aid received from all sources was reported by Missouri higher education institutions for Fiscal Year 1978. Two of the public institutions -- Missouri Western State College and the St. Louis Community College campuses -- five independent institutions and two technical and professional institutions did not return the student financial aid forms to the Department by the time this report was prepared. Missouri Student Grant Program award information is included for all institutions with student recipients.

The MDHE's Division of Student Financial Aid estimates that the actual amount of financial aid awarded to students enrolled in Missouri Higher Education institutions is at least fifty million dollars greater than the total reported. A survey of financial aid awarded at all Missouri institutions in 1975-76 showed a total of $30 million more than the total reported for 1977-78. Also, according to federal information, there was $20 million more in BEOG grants awarded to students enrolled in Missouri higher education in 1977-78 over 1975-76.

Sources of Student Financial Aid

The federal government provides the largest portion of student aid, 66% of the aid reported for 1977-78. Institutions provided 25%, the Missouri Student Grant Program provided four percent, and five percent was provided by other sources. A breakdown and definition of aid categories follows. Refer to Table 1, on the next page, for a breakdown of the sources of student financial aid for students enrolled in Missouri higher education institutions.

The Missouri Grant Program made grants to individual students based on financial need and educational expenses, within the limits of $900, 50% of tuition as of 1971-72, or actual calculated financial need, whichever is lowest. These awards totaled approximately six million dollars in 1977-78.

The almost $47 million reported in federal financial aid includes Basic

[6]Institutions not reporting: Central Missouri, Harris-Stowe, Missouri Western, St. Louis Community College campuses, St. Louis University, Avila College, Cardinal Newman College, Park, Southwest Baptist College, Tarkio College, Cottey College, St. Mary's College, St. Paul's College, Wentworth Academy, Kirksville College of Osteopathic Medicine, Linn Technical Institute.

Educational Opportunity Grants (BEOG), Supplemental Educational Opportunity Grants (SEOG), National Direct Student Loans (NDSL), College Work Study (CWS), and other grants and loans from the federal government. The majority of these funds are need-based.

An additional approximately $47 million was reported from other federal sources, which includes financial aid from Federally Insured Student Loans, the Veterans Administration, and Vocational Rehabilitation. Since many institutions did not attempt estimates for funds from these sources, it is likely that a much higher portion of student financial aid comes from these sources than was reported.

Funds from need-based financial aid and non-need-based financial aid, provided by institutional sources and non-institutional, non-governmental sources fall into three basic categories: 1) grants, scholarships, and fellowships recognizing academic, athletic, and other special talents; 2) loans; and 3) student employment. See the appended tables for detailed data for each institution. Private or "non-government and non-institutional" sources of aid might include foundations, local citizens, businesses and community organizations.

Composition of Student Financial Aid

Students at state-supported institutions received 59% of student financial aid reported for 1977-78. The University of Missouri reported 31% of the total financial aid, the state four-year institutions reported 22% and the state two-year institutions reported 6%. The independent sector reported 36% of the total and the professional and technical sector had 5%. Refer to Table 2, page 8.

TABLE 2. COMPOSITION OF STUDENT FINANCIAL AID, BY SECTOR, 1977-78*

	Reported Financial Aid (in 000's)	Percent of Total
University of Missouri	$ 44,319	31
State Four-Year	31,089	22
State Two-Year	8,183	6

Source: MDHE Division of Student Financial Aid, MDHE Forms 14-1, 14-2, 14-3, 14-4, FY 1978.

*Refer to Appended tables for list of institutions not reporting.

Over sixty-thousand financial aid recipients were reported by Missouri higher education institutions. Refer to Table 3, page 9. This is approximately thirty percent of the total headcount enrollment in the state which was 204,858 in fall 1977. Since several institutions are not included in this report, the actual percentage of students receiving financial aid in Missouri is probably over one-third. Most of the recipients, over forty thousand, were Missouri residents. Nearly three-quarters of the reported financial aid recipients were enrolled at public institutions; 23% were enrolled in independent institutions, and three percent at professional and technical institutions.

*Institutions not reporting: University of Missouri-Rolla, Western, Longview, St. Louis Community College campuses, St. Louis University, Avila College, Park College, Southwest Baptist College, Cottey College, St. Paul's College, Kirksville College of Osteopathic Medicine, and Linn Technical Institute.

**Total does not agree with detail because of inconsistencies in the detail reported by the institutions. Refer to Table A-8 for detail by institution.

University of Missouri

The University of Missouri reported $44,319,000 in student financial aid for 1977-78. Refer to Table 4. Twenty percent was from institutional funds, 68% from the federal government, two percent from the state and ten percent from other sources. Students attending University of Missouri campuses received 31% of the total reported financial aid awarded and accounted for 22% of the reported award recipients. The actual percentage of financial aid going to students at the University is probably slightly less than 31% since all campuses of the University are included in these totals while no other category of institutions had all campuses reporting.

TABLE 4. COMPOSITION OF STUDENT FINANCIAL AID REPORTED BY UNIVERSITY OF MISSOURI, 1977-78*

*Refer to appended tables for detail by campus. All University of Missouri campuses reported.

State Four-Year Institutions

The other state four-year institutions reported a total of $31,089,000 in student financial aid. Refer to Table 5 below. Almost eighty percent of these funds were from federal sources, sixteen percent from institutional sources, four percent from the state, and one percent from other sources. The state four-year institutions reported 22% of the total reported financial aid and 43% of the award recipients. Missouri Western was the only state four-year institution that failed to report on all of the financial aid forms.

*Refer to appended tables for detail by institution and list of institutions not reporting.

State Two-Year Institutions

The state two-year institutions reported a total of $8,183,000 in student financial aid in 1977-78. Refer to Table 6 below. Ninety percent of these funds were from federal sources, seven percent from institutional funds, two percent from the state, and one percent from other sources. Students at the state two-year institutions received six percent of the total financial aid reported in the state and comprised nine percent of the award recipients. St. Louis Community College is the only state two-year institution which did not report in time to be included in this report.

*Refer to appended tables for detail by institution and list of institutions not reporting.

Independent Institutions

The independent institutions reported a total of $50,725,000 in financial aid. Refer to Table 7 below. Fifty percent was from federal sources, forty percent from institutional funds, eight percent from the state, and two percent from other sources. The independent institutions reported 36% of the total financial aid reported and 23% of the reported recipients. Several independent institutions are not included in this report. Saint Louis University, the second largest independent institution in the state, did not report on three of the forms in time to be included in these totals.

*Refer to appended tables for detail by institution and list of institutions not reporting.

Professional and Technical Institutions

The professional and technical institutions reported $7,547,000 in student financial aid. Refer to Table 8 below. Seventy percent was from federal sources, five percent from institutional sources, two percent from the state, and 23% from other sources. Students at the professional and technical institutions received five percent of the total financial aid reported and comprised three percent of the award recipients. Two professional and technical institutions, Missouri Institute of Technology and Linn Technical Institute, did not report in time to be included in this report.

III. Conclusion

Student financial aid comprises an important part of the financing of higher education nationally, and in Missouri. Over one-hundred forty million dollars in student financial aid was reported by Missouri institutions for 1977-78, which provides a base year of student financial aid information.

Only limited conclusions can be drawn regarding these data at this time. Students at the University of Missouri and the independent sector institutions received proportionately more financial aid per award recipient, than students enrolled in other institutions. Students in the independent institutions received relatively higher proportions of aid from the Missouri Student Grant Program and from institutional sources. Students at state-supported institutions received relatively higher proportions of federal sources, including federal loan programs (FISL and NDSL). Caution should be used in interpreting these patterns however. Graduate student aid is included in all financial aid categories, except the Missouri Student Grant Program. Also, since a large percentage of private institutions failed to report on MDHE forms, the proportion of financial aid received by this sector is greater than is reported here for all aid categories except the Missouri Student Grant Program.

In addition to documenting the amounts of student financial aid awarded to students in Missouri higher education in 1977-78, this report has attempted to point to some of the weaknesses in the present reporting system. Better reporting systems for student financial aid funds at the institutions and improvement in the instructions that accompany the MDHE financial aid forms should encourage better reporting for next year.
